SUPPLEMENT TO REPORT NO.

25X1X 1.

[redacted] the Germans built a pipe line, six to eight inches in diameter, from Zistersdorf to Brtix (Most), Czechoslovakia, a distance of approximately 100 kilometers (sic). This line was originally used to pump high-test gasoline stock from a large catalytic refinery at Brtix to Zistersdorf, where the gasoline from Brtix was blended with low-grade gasoline produced in Austrian oil fields. Since the war the Soviet Oil Administration has used this pipe line to pump oil and other petroleum products from Zistersdorf to Brtix. [redacted] this is the only pipe line running between Austria and Czechoslovakia. [redacted] does not believe that this pipe line has been extended beyond Brtix in the direction of the USSR.
